subsidiary

Oditel Sp. z o.o.

subsidiary

WHAT OUR MISSION AND VISION

Mission:

To provide flexible and reliable industrial manpower solutions that empower our clients to complete complex projects on time and within budget.

Vision:

To become the most trusted technical partner for heavy industry in Europe, recognized for combining human expertise with engineering precision.

BOARD OF DIRECTORS & QUALIFICATIONS

GANESH EMMADI

CEO

Expertise: Welding & NDT

Qualifications: IWE & EWE,
CSWIP 3.1

Certifications: NDT Level 3
(ASNT & ISO 9712: MT, PT, UT,
RT, VT)

Auditing: IRCA Lead Auditor ISO
9001:2015

SANTOSH KUMAR

PATNAIK

CEO

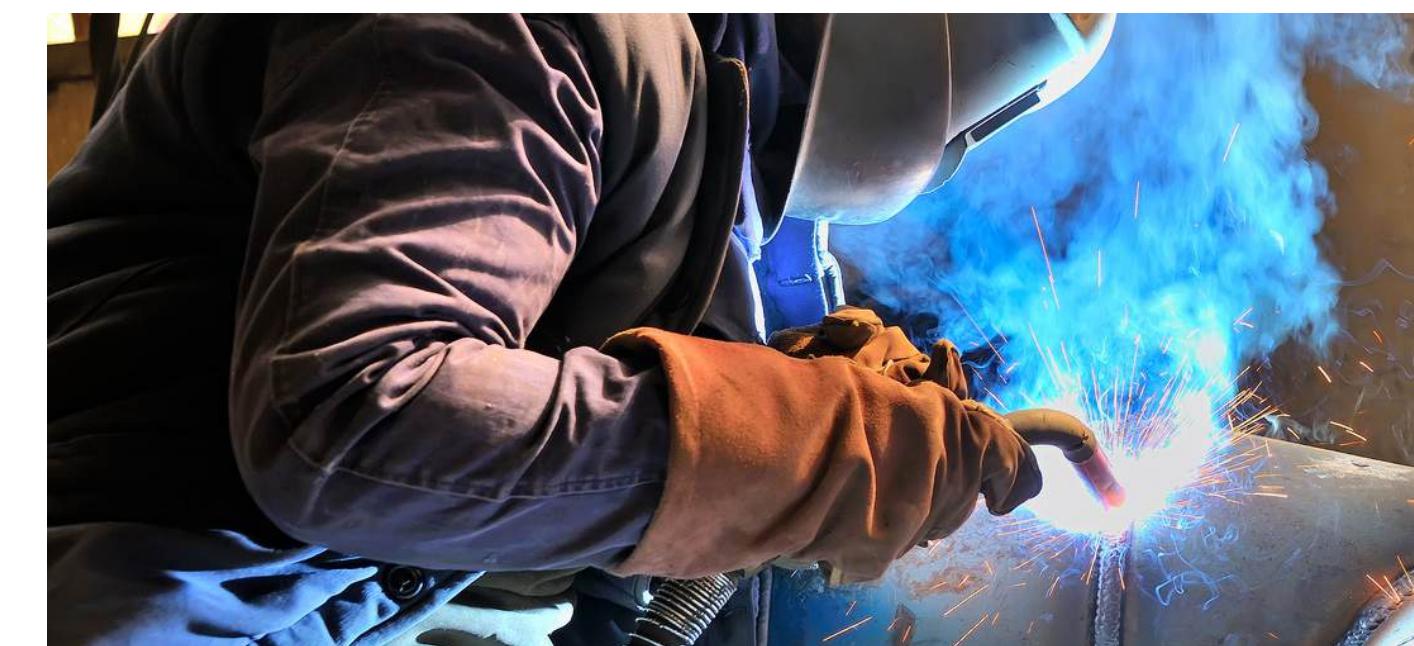

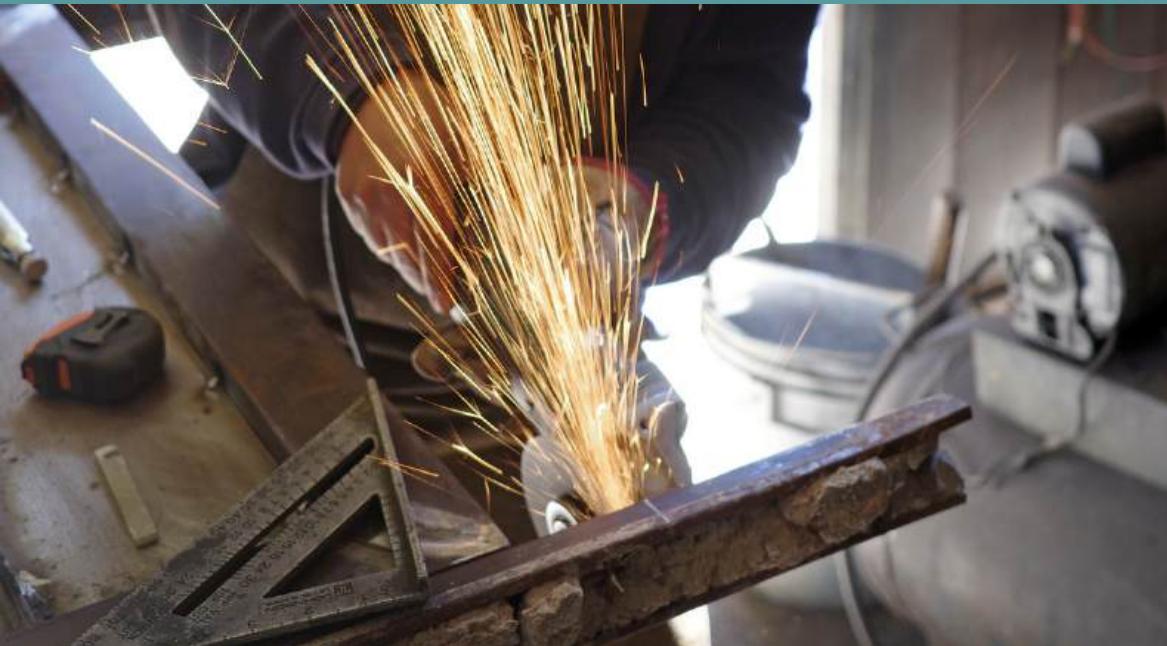

Expertise: Welding & NDT

Certifications: NDT Level 3 (ISO
9712: MT, PT, UT, RT, VT)

Auditing: IRCA Lead Auditor ISO
9001:2015

FGS Polska leverages the specialized knowledge of its founders to bridge the gap between recruitment and technical execution.

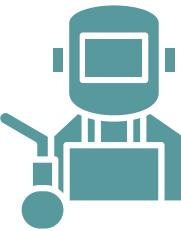

Because our CEOs are certified experts in Welding and NDT, we understand the complexities of your projects from the inside out. We strictly vet our personnel against our own high engineering standards to ensure flawless service quality.

SCOPE OF SERVICES & MANPOWER

We provide skilled personnel for project completion and manufacturing jobs based on the agreed scope of work.

Key categories:

Specialized Welders

Methods 141 (TIG), 111 (MMA), 135/136 (MIG/MAG)

Fitters

Pipe fitters and steel structure fitters

QA/QC & Inspection

Quality assurance staff and NDT technicians

Support Staff

Ironworkers, sandblasters, painters, and general labor

KEY INDUSTRIES & SECTORS

Specialized support for demanding environments.

Structural steel & construction

- Heavy steel structures
- Industrial halls & infrastructure
- Civil engineering support

Industrial piping & pressure systems

- Process pipelines for oil & gas
- High-pressure vessels & boilers
- Transmission pipelines

Heavy industry & manufacturing

- Petrochemical plants & refineries
- Power plants
- General manufacturing

Renewable energy & wind power

- Wind towers manufacturing (onshore & offshore)
- Energy infrastructure components

CAPACITY & REACH OUR POTENTIAL

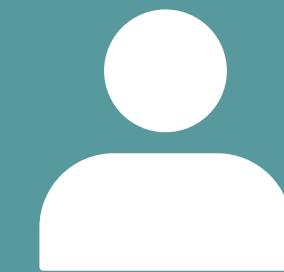

Global reach

We successfully deploy teams across Poland and internationally in Germany, Belgium, and the Czech Republic.

We handle full mobilization for diverse industrial sectors.

WHY CHOOSE FGS POLSKA?

OUR COMPETITIVE ADVANTAGE

Technical precision backed by engineering standards

Technical & isometric drawing literacy

Our workforce is not just manual labor—they are technical professionals. Our fitters and welders are proficient in reading complex technical drawings and isometrics, ensuring independent and error-free fabrication without constant supervision.

Pressure equipment & critical structures

We specialize in high-responsibility tasks. Our teams are experienced in welding pressure vessels, pipelines, and boilers strictly according to PED (Pressure Equipment Directive) and ASME standards.

Compliance with European Norms (EN/ISO)

To provide flexible and reliable industrial manpower solutions that empower our clients to complete complex projects on time and within budget.

The 'engineer-vetted' guarantee

Every worker is technically verified by our internal IWE & NDT Level 3 experts before they reach your site. We filter for true skill, eliminating the risk of underqualified personnel.

Full logistic & legal compliance

We take full responsibility for the workforce organization. From legalizing employment (visas, A1 forms) to arranging accommodation and transport to the site. We deliver a 'ready-to-work' team, so you can focus purely on project execution, not administration.

A close-up, low-angle photograph of a welder's hands and a welding torch. Sparks are flying in all directions, creating a dynamic, glowing effect against a dark background. The welder is wearing a dark protective jacket.
